Experience

Full-stack Developer

Oct 2021 – Present

Edusoft Technologies

edusoftech.eu

I am responsible for developing new components and modules for various applications, with a focus on both web and mobile platforms. I solve technical product issues and coordinate with business stakeholders to provide solutions. Additionally, I actively contribute ideas to the product development roadmap, actively participate in code reviews and architecture discussions, and prioritise performance, scalability, and usability in my coding practices.

Software Developer

Jul 2021 – Sep 2021

CIUrb

www.clurb.net

During my time as a software developer in the company, I focused on enhancing the reliability of web applications through automated testing. My role involved the creation and execution of test scripts, improving test accuracy and efficiency. The position demanded strong problem-solving skills and a thorough approach to validation, ensuring that all functionalities aligned seamlessly with the expected outcomes.

Education

Romanian-American University

www.rau.ro

Bachelor's degree, Computer Science, Faculty of Cybernetics, Statistics and Economic Informatics

I earned a Bachelor of Science degree in Computer Science from the Romanian-American University, where I gained knowledge and practical experience in various computer science topics, including programming, algorithms, data structures, computer architecture, database management, and computer networks. I had the opportunity to work on practical programming projects that involved using Java, C++, and Python, which helped me gain hands-on experience and develop my problem-solving and teamwork skills
